

Faces of the Future 2023 Visages de L'avenir

Clara Grant

Clara Grant, Atlantic Undergraduate

My name is Clara Grant, and I am entering my fourth year of the Sustainable Design Engineering program at the University of Prince Edward Island. Through my education and work experience, I have gained an interest in electrical engineering and mechatronics, which I plan to pursue in the coming years. I am incredibly honored to receive this award and be chosen as a CEMF Engineering Ambassador. It means a lot to me because I am very grateful to the female role models that I have had through my experience studying and working in engineering, and I am excited to be able to become a role model for the next generation of young women engineers. Being recognized at the national level as an engineering ambassador is something that I had never imagined was possible, and it has inspired me to continue to become more involved in my local engineering community. This scholarship has boosted my confidence and reassured me that I am following the right career path. Along with the financial benefits, this award will allow me to continue to prioritize my studies year-round. I look forward to being a CEMF Engineering Ambassador alongside other talented young women.
