

Sarah Hall, Pomerleau Undergraduate

My name is Sarah Hall and I am extremely grateful to be the recipient of the CEMF Pomerleau Ambassador Scholarship. This fall I will be entering my final year of Civil Engineering at Dalhousie

University, with an expected graduation date of June 2024. I am planning to specialize in Water Resources Engineering this next year and have a goal to pursue graduate studies in a coastal water field after graduation. I am currently working in the Dalhousie Coastal Hydrology lab for the summer and have recently begun my new role as President of the Dalhousie Undergraduate Engineering Society. During my education so far, I have had the privilege to have had several strong females in engineering as role models. I can say, for certain, that these individuals have played a dramatic role in how I perceive the engineering profession, and my future. These ladies have encouraged me to overcome adversity, offered career advice and have become mentors and friends. This award will not only relieve some of the financial stress I feel about school but encourages me to help the next generation of female engineers, as these ladies have helped me. As someone who has self-funded my education so far, this scholarship will reduce my need for student loans for this next year, which brings an immense relief.
