## Canadian Engineering Memorial Foundation Announces 2008 Scholarship Winners

**Megan Fill of Mississauga, Ontario** has been named one of two top undergraduate engineering students across Canada by Hewlett-Packard and the Canadian Engineering Memorial Foundation.

Ms. Fill is in her third year of chemical engineering at Queen's University. She will be awarded with a \$2,500 Hewlett Packard Undergraduate Scholarship in recognition of her accomplishments.

"Hewlett-Packard, in collaboration with the Canadian Engineering Memorial Foundation, is pleased to present Ms. Fill with this scholarship," says Dan Marcek, Business Strategy Manager of Hewlett-Packard University Relations.

"Ms. Fill's enthusiasm for her studies shows through in her creation and promotion of an association called *Guide to Engineering, Information, Applications and Resources* – a tool used to educate students on the engineering industry."

"Her inventiveness embodies everything the HP Undergraduate Scholarship stands for and we wish her all the best in her future endeavors."

Along with the \$2,500 scholarship, Ms. Fill will receive a Hewlett-Packard expense-paid trip to the CEMF Annual Awards Luncheon in Québec City during the occasion of the Annual General Meeting of Engineers Canada on May 23, 2008.

The Canadian Engineering Memorial Foundation was founded in 1990 and honours the memory of the 14 women from École Polytechnique in Montreal who lost their lives on December 6, 1989.

CEMF is committed to creating a world where engineering meets the needs and challenges of Canadians by utilizing the skills and talents of men and women alike, promoting engineering as a career choice with the generous support of Canadian corporations and many individual engineers from coast to coast.

The Foundation provides a total of 16 scholarships at the undergraduate, Masters and Ph.D. levels of study and promotes engineering as a career choice for women through their website, press releases, Annual Awards Luncheon and scholarship winner presentations to high school students.
