## Dalhousie University student Zoe Smith selected as the 2022 Marie Carter Memorial Scholarship Winner

**(Renfrew, Ontario):** The Foundation is proud to announce that Zoe Smith, a Chemical Engineering student Dalhousie University, has been named the 2022 Marie Carter Memorial Undergraduate Engineering Scholarship Winner.

Zoe believes that the opportunities in the field of engineering are vast and dynamic. She wants to help others realize this and inform them of the possibilities that are available when considering engineering as a career path. She is VP Communications for the Undergraduate Engineering Society, of the Dalhousie Chemical Engineering Society and Chief Editor of the Dalhousie Engineering Yearbook.

Zoe has always been curious about how things worked and how they were made. She is a problem solver and says: “I want to make a positive impact on society”

This prestigious \$5,000 scholarship is awarded in memory of Marie Carter, P.Eng., whose work in the field was instrumental. This is awarded annually to the most promising woman interested in the mechanical or industrial engineering field at the university level.

“It is heartening to see so many qualified and capable applicants” says Julie Lassonde, CEMF President. “Ms. Smith is a worthy award winner and we look forward to watching her continue to help connect young Canadians, with engineering and its vast possibilities as a viable career choice for other young women. We’re delighted to see her infectious enthusiasm for engineering, and are thrilled to be supporting her in her future endeavors.”

Since 1990, the Foundation has been promoting engineering as a career choice for young Canadian women through its extensive award and networking program.
